

Backend Project 2 - Debugging

1. Bug: Home route allowed only POST request.
Fix: Added both GET and POST methods to the route.
2. Bug: Form data was accessed using `request.args`.
Fix: Replaced `request.args` with `request.form` to correctly handle form submission.
3. Bug: HTML form did not specify method.
Fix: Added `method="POST"` in the form tag.
4. Bug: Empty notes were added to the list.
Fix: Added validation to prevent empty notes.
5. Bug: Application failed to load initially.
Fix: Ensured proper handling of GET requests.
